

## Would you like audio recorded for your web site, video or CDs/mp3s?

We offer audio recording, music composition, mixing and mastering to a range of media.

As musicians, engineers and facilitators: Linda and Keith have worked on hundreds of tracks for live performance, backing tracks and CDs.

We have produced music for live performance, street performance, and performance art, theatre, video, radio and advertising. This has been for individual recording artists, bands, community arts organizations, tribute groups, audio training courses and corporate audio resources.

We have worked for many years with community projects and on large-scale live performances, music for film and video.

As vocalist with **Loop Guru**, Linda has appeared live, on TV and radio in Europe, USA and Canada. She appeared on the Loop Guru albums *Amrita* and *Loop bites Dog*.

She helped co-write and sang on the **Slipper** albums *Invisible Movies* and *Zoon Sandwich*. She provided vocals on *Loungeclash* CD and single 'Just Lik This' which were released in the USA and the UK.

## Audio editing and mastering

We can edit and master your music or soundtracks - enhancing the sound and increasing volume and clarity. We can sequence your tracks (including fades, gaps and changes for level consistency) and prepare them for CD burning. We can burn short run CDs or prepare a CD master ready for duplication.

We also record, edit and master audio and video soundtracks - mixing commentary, music and sound effects - such as Keith's work at *Working with Words with Transport for London* or *European Year of Disabled People*.

We can optimise your music for the web - producing mp3 files and uploading these to your web site or YouTube.

We can integrate audio into your web site to add accessibility for people who find it hard to read. This means that your information will be available to the maximum number of site visitors.

We use *Steinberg Cubase* and *Wavelab*, as well as virtual instruments and effects such as *Halion*, *Stylus RMX* and *Amplitube*.

## Soundtrack composition

We can create original music for film, web or performance. We wrote the soundtrack for the independent film *Treatment* by Michael Malonsky and Iliko Kuruliszwili.

We can synchronize music to your visuals - adding hit points and sound effects in time with the images.

## Rates

Most of our audio work is charged by the hour, but the rate for use of recorded music in video production or performance is negotiable and will provide previously recorded music free for small charities or community projects.

We operate a community-conscious pricing structure. Contact us with your needs and budget - we will listen.

## Customers' comments on our soundtrack work

"Keith has an impressive record as a guitarist, songwriter, instrumentalist and composer. His range and knowledge of musical genres is vast and his ability to collaborate with a diverse group of people to bring about something fresh and original always impresses me."

He knows his way around studio technology whether it is cutting edge musical software or the more traditional methods of studio technology. His ability to work with others in a sensitive and nurturing way means that whether the project is film, theatre or record - he gives his all and brings out the best from musicians and performers while staying attuned to the needs of the project."

**Paul Golding, Owner, This Digital Chamber Music Company, Portland, Maine, USA**

"Keith apart of being an extremely versatile musician with his 'otherness' projects is an experienced composer/music producer delivering music and sound editing for films and video in a wide range of genres (film /drama, educational and community). I've work with Keith on several projects where his music productions were always excellent!"

**Piotr Obal, Film maker, editor and facilitator**

"I've been really happy with everything Keith's done for my web site. A diamond!"

**Liz Fletcher, Jazz vocalist**
